

CYNTEGRITY

MYRBQM PORTAL NEW VERSION 6.9.0 RELEASE

NEW V6.9.0 | NEW FEATURES AT A GLANCE

- **MFA Authentication** | Satisfying your security needs
- **Rebuilt Study Protocol Interface** | Facilitating easier study setup
- **UI Optimizations** | Making RBQM more intuitive at every mouse-click

NEW V6.9.0 | SECURITY OPTIMIZATIONS

Introduction of Multifactor Authentication (MFA):

In addition to Single-Sign-On (SSO) functionality, the Portal now features MFA.

Company Admins will be able to enable MFA for their company. This will:

- Implement MFA on login, requiring a verification code that will be sent to the user's email

The screenshot displays the 'Company Management' interface for 'Cyntegrity'. On the left, a navigation menu includes: Overview, Company Management (highlighted in red), User Management, Roles, Testing Functionality, License Management, Shared Study Config, and User's session timeout. The main content area shows settings for the 'demo' company, including an API key with a 'Regenerate' button and a link to 'Integration API Documentation'. Below this, there are two toggle switches: 'Enable MFA for this Company' (currently unchecked) with a 'What does this mean?' link, and 'Allow access to newly created Studies to all Company Users' (checked). An orange arrow points from the text 'This will:' to the 'Enable MFA for this Company' checkbox. To the right, a 'Sign In' modal is shown, featuring the Cyntegrity logo, a 'Log in as' dropdown, a message about a verification code being sent to the user's email, a 'Verification code' input field, and a 'Sign In' button.

NEW V6.9.0 | REBUILT “STUDY PROTOCOL” INTERFACE

The user interface of the Study Protocol section of the Study Settings has been simplified:

This will improve your workflow when submitting additional study protocol data to the Portal, such as your Enrollment Plans and Study Outcomes.

Data Processing

- › Setup
- › Data Upload
- › **Study Protocol**
- › Configure
- › Configure QTLs
- › Import/Export Config
- › Technical Config
- › Recent Tasks
- › DB Logs

Study Protocol Data

Important!

Additional study protocol data and study data, as well as the rest of the values configured on this page, may be **overwritten** by later data imports.

Additional Study Protocol Data and Study Data

Data Type

Enrollment Plan

Enrollment Plan

Study Outcomes

Accepted file types:

- .XLSX Files — Excel Workbook (Excel 2010 and later versions)
- .XLS Files — Excel 2003 Workbook (binary file format)
- .CSV Files — CSV (Comma delimited)

Download

Upload

Clear

Please note:

The template/sample file can be downloaded after the first data import is done.

NEW V6.9.0 | UI OPTIMIZATIONS

User Interface (UI) Improvements

In addition to the rebuilt Study Protocol interface, we have also added or refined a few minor UI/UX features and bugs, such as, but not limited to:

- Adding pop-up windows where required to add rationale for key actions, thus improving the audit trail
- Not allowing blank fields for key user details in the User Account page
- Removing/editing confusing data labels where relevant
- Addition and refinement of error and help messages
- Tooltips have been added and refined to provide additional guidance in daily activities

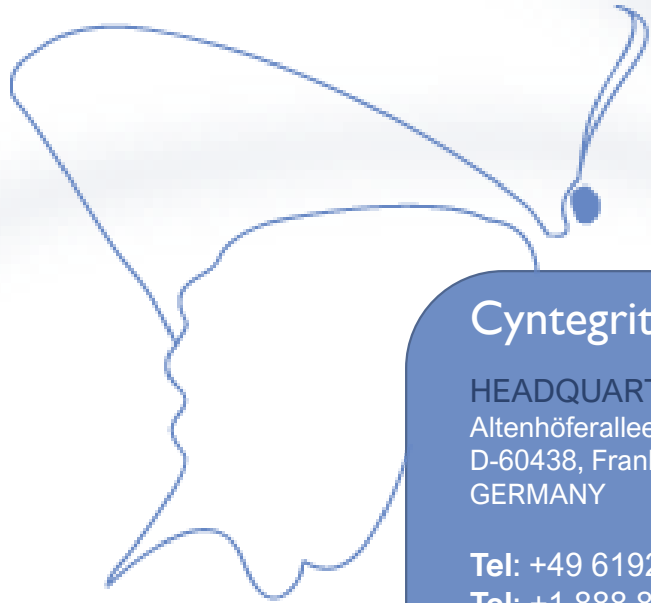

NEW V6.9.0 | BUG FIXES AND IMPROVEMENTS

In our ongoing pursuit of perfection, we are constantly making improvements:

As such, all our releases also include many minor bug fixes, minor UI improvements, and general improvements related to the MyRBQM Portal's functionality, user-friendliness, analytics and predictive power and security, to ensure that you always have the best tool at your disposal to conduct a successful, and quality data-driven study.

We always appreciate feedback from our users. If you have any issues or suggestions, be sure to get in touch with your designated Project Manager or email us at post@cyntegrity.com.
